

P-K STORM®

RELIABLE EQUIPMENT FOR DEMANDING
CONDITIONS

 **PATTERSON-KELLEY** 

Designed for Maximized Comfort Without Sacrificing Savings

The P-K STORM® is built to transform the commercial boiler market. This top of the line, highly efficient condensing boiler is designed to maximize comfort during those long cold winter days without sacrificing savings. The P-K STORM® water-tube boiler operates at up to 97% thermal efficiency with 10:1 mechanical turndown capabilities.

Advanced Design

The advanced design of the P-K STORM® heat exchanger has the end user in mind when it comes to performance and longevity of a boiler. Between headache-free annual maintenance, available outdoor units, and higher turndown capability to match input building loads, the P-K STORM™ is ready for any forecast that may be in its future.

10:1 Mechanical Turndown Standard

10:1 mechanical turndown is standard on all P-K STORM® units. Patterson-Kelley has achieved higher turndown with a unique process that allows the gas valves to reliably turn down without adding excess air. This allows designers the ability to match input to building loads without sacrificing reliability.

FEATURES

- ✓ 1250-8000 MBTU
- ✓ Up to 97% thermal efficiency
- ✓ 316L Stainless steel coil ensures maximum corrosive resistance and durability
- ✓ Full modulation burner with up to 10:1 mechanical turndown
- ✓ Cabinet and heat exchanger design reduce repair and maintenance costs
- ✓ Outdoor Capabilities
- ✓ Variable speed combustion air blower
- ✓ Certified at 3.5 inch Water Column minimum gas pressure
- ✓ Pressure drops as low as 4.7' at 40° ΔT
- ✓ The compartmentalized design produces efficiency of heat transfer in each section

Compartmentalized Heat Exchanger Design

The stainless-steel heat exchanger in the PK STORM® is designed to allow water to efficiently flow through two separate sections. This optimizes the transfer of heat by using temperature differential to its advantage. The insulated deflector lets combustion air run over the warmest water exiting the unit, and as the flue gas condenses, pass over the second section. This allows for efficient passage of heat, supporting the largest potential for heat transfer across the entire exchanger. Condensate drains freely out of the bottom of this condensing section while cooled combustion gas freely exits through the outlet.

Simplified Serviceability

The heat exchanger is designed to provide ease of access for simplified and quick maintenance. The heat exchanger door swivels open for full access to the tubes and burner inside the unit. This makes maintenance, including cleaning, a quick and cost effective process..

EQUIP OUTDOOR TECHNOLOGY

Factory assembled and tested for outdoor installations with efficiencies up to 97% and 10:1 mechanical turndown rate. Available on models ST650 - ST2000

NURO® Touch-screen control system

The NURO® Touch-Screen Control System with NURO® Connect provides the most intuitive interface in the industry. Designed to maximize efficiency, the NURO® monitors and modulates the combustion and ignition of the boiler to maintain the desired outlet temperature. The lead/lag setup and boiler start rotation ensures run times are equally distributed across each unit in the system, extending the life of the boilers. Whether using a desktop or mobile device, NURO® Connect allows for quick, easy modification of system parameters of optimal efficiency.

PK Solutions

Patterson-Kelley provides solutions for all indoor and outdoor applications. Visit www.pattersonkelley.com for more information on your heating needs.

SIMPLIFIED SERVICEABILITY:
HEAT EXCHANGER DOOR SWIVELS OPEN TO PROVIDE FULL ACCESS TO THE TUBES AND BURNER INSIDE THE UNIT

SIGNIFICANTLY LOWER WATER PRESSURE DROPS:
REDUCES COST BY REQUIRING SMALLER PUMPS AND LESS ELECTRICAL ENERGY

10:1 MECHANICAL TURNDOWN:
ALLOWS FLEXIBILITY TO MATCH INPUT TO BUILDING LOADS, AND DOES NOT INTRODUCE EXCESS AIR ALLOWING MAXIMUM THERMAL EFFICIENCY

AHRI Certified
Up to **97%** efficiency

Pressure Drop Data

PK Outdoor Solutions

Patterson-Kelley provides outdoor solutions to safely and efficiently mitigate space restraints and allows outdoor placement of equipment.

Outdoor Products from the Factory

STORM®*

- ✓ Outdoor Capabilities on models 1250 - 2000 MBTU
- ✓ Fuel Options: Natural Gas (NG)
- ✓ Unique stainless alloys resist corrosive condensation
- ✓ Full modulation burner with up to 10:1 mechanical turndown
- ✓ Front accessibility reduces repair and maintenance costs
- ✓ Cabinet and heat exchanger design reduce repair and maintenance costs

AHRI
Certified
Up to
97%
efficiency

Outdoor Bundles Available

MACH®*

- ✓ Available on models 750 - 2000 MBTU
- ✓ Fuel Options: Natural Gas (NG), Liquid Propane (LP), Dual Fuel
- ✓ All-purpose boiler suitable for condensing and non-condensing systems
- ✓ Cast Aluminum Heat exchanger resists corrosive condensate
- ✓ Compact design fits through a standard 36" doorway
- ✓ Full modulation burner with 5:1 turndown
 - + 10:1 Mechanical turndown available on Indoor Natural Gas (NG) models C750, C900, C1050, C1500, C2000
- ✓ Automatically compensates for changes in air temperature and pressure

AHRI
Certified
Up to
95%
efficiency

MODU-FIRE®* Forced Draft

- ✓ Available on models 750 - 2000 MBTU
- ✓ Venting: Category II or IV
- ✓ Eliminates short cycling in high variable speed pumping systems
- ✓ Fuel options: Natural Gas (NG), Liquid Propane (LP)

AHRI
Certified
Up to
88%
efficiency

Created with space constraints in mind, Patterson-Kelley has made these industry-trusted solutions available for outdoor use. Whether it is on top of the penthouse or installed on the ground outside, PK outdoor solutions can withstand the elements.
